

Imagine a creature that looks like it's from an alien planet, but it's actually right here on Earth! That's the hickory horned devil caterpillar, a cool crawler with looks that are out of this world. These caterpillars are a bright green color, grow to be about as long as your hand, and have spiky horns on their heads that look scary,

but are actually harmless. Plus, they have tiny red dots running down their sides, making them even more unique!

Now, with a name like 'hickory horned devil', you might wonder where these critters call home. Well, they're usually found chomping away on hickory, walnut, and persimmon trees in the eastern United States. They also like to munch on sweet gum trees and certain types of ash trees. Yummy! for them, at least.

So, we've learned that these creepy crawlies have a unique look and a particular taste in trees, but what about their life cycle? After hatching from an egg, our alien-looking friend will spend its time eating and growing until it's ready to become a pupa, kind of like a butterfly in a cocoon. After a few weeks, it will emerge as a beautiful Regal Moth, which is one of the largest moths in North America! Isn't that an amazing transformation?

It's been a wild ride learning about the hickory horned devil caterpillar, hasn't it? From its alien-like appearance to its interesting life cycle, there's so much to love about this unique creature. Though its horns might look scary, they're actually harmless to humans and other animals. And remember, despite their devilish name and appearance, these caterpillars transform into beautiful moths, proving that you can't judge a book by its cover!

	Hickory Horned De	wil	Caternillars	Name:
Solv	e each problem.	//11	Caterpinars	Ivanie.
Use	the article to answer the question.			
	What does a hickory horned devil caterpillar	tran	sform into?	
	A. a monarch butterfly	B.	a viper moth	
	C. a Regal Moth	D.	a hickory horned moth	
2)	What is one of the largest moths in North An	nerio	ca?	
,	A. Super Moth		Giant Moth	
	C. Regal Moth	D.	Mega Moth	
3)	What color are the tiny dots on the hickory h	orne	d devil caterpillars?	
	A. red	B.	yellow	
	C. blue	D.	green	
4)	Where are hickory horned devil caterpillars u	isual	lly found?	
	A. South America	B.	Africa	
	C. Europe	D.	The United States	
5)	How long does it take for a hickory horned d	evil	caterpillar to emerge as a l	Regal Moth after
	becoming a pupa? A. a few months	D	a few days	
	C. a few years		a few weeks	
_				
6)	What color are the hickory horned devil cate	-		
	A. brown		red	
	C. black	D.	green	
7)	What type of trees do hickory horned devil ca	-		
	A. apple, pear, cherry, and plum trees	В.	bamboo, palm, eucalyptu willow trees	s, and
	C. hickory, walnut, persimmon, sweet gum, and ash trees	D.	pine, oak, maple, and bird	ch trees
8)	Are the horns on a hickory horned devil cater	rpill	ar harmful to humans and o	other animals?
	A. Yes	B.	Only to other animals	
	C. No	D.	Only to humans	
9)	Do the spiky horns on the hickory horned dev	vil c	aterpillars' heads hurt?	
	A. Only if they shoot them out	B.	Only the red portions are	dangerous
	C. No, they are harmless.	D.	Yes, they are sharp and c	an hurt.
10)	Where in the United States are hickory horne	ed de	evil caterpillars usually fou	nd?
	A. Eastern United States	B.	Central United States	
	C. Southern United States	D.	Western United States	

- 11) What does a hickory horned devil caterpillar look like?
 - A. brown with antennas on their heads
and orange stripesB. black with smooth horns and yellow
dots
 - C. bright green with spiky horns on their heads and red dots on their sides
- D. red with long antennas and blue spots on their sides

Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

- 12) "Even though I have a unique look, I still undergo metamorphosis like other insects."
- 13) "I'm not like other tiny caterpillars you may have seen. I can grow to the size of your hand."
- 14) "I hate hickory trees, they taste awful."
- **15**) "I spend my time nibbling on the leaves of trees. I especially love the leaves of hickory, walnut, and persimmon trees."
- 16) "My green color is not just for show, it helps me blend in with the lush green foliage."
- 17) "After a few weeks as a pupa, I am reborn as a beautiful Regal Moth, one of the largest moths in North America!"
- 18) "I do not like to eat from sweet gum trees."
- 19) "See these spiky horns on my head? They might look scary, but they won't harm you."
- 20) "It may sound unappetizing, but I love to eat leaves from the ash tree."
- 21) "I am tiny and barely visible."
- 22) "I don't transform into a moth, I remain a caterpillar throughout my life."
- 23) "You can find me mostly in the eastern parts of the United States."
- 24) "I metamorphose into a pupa, similar to how a butterfly stays in a cocoon."
- 25) "My horns are very dangerous and can harm you."
- 26) "I don't have any color on my body at all, I'm just plain green."
- 27) "My horns are not just for show! They make me look scary and protect me from predators."

Determine if the statement is a fact or opinion based on the information in the article.

- 28) Hickory horned devil caterpillars feed on hickory, walnut, and persimmon trees.
- **29**) Hickory horned devil caterpillars are the most beautiful caterpillars.
- **30**) Hickory horned devil caterpillars live in the eastern United States.
- **31**) The Regal Moth, which the hickory horned devil caterpillar turns into, is one of the prettiest moths in North America.
- 32) These caterpillars are bright green in color.
- **33**) The hickory horned devil caterpillar's transformation into a moth is one of the most incredible in the animal kingdom.
- **34**) The Regal Moth is one of the biggest moths in North America.
- **35)** Hickory horned devil caterpillars have red spots on their sides.
- **36**) The hickory horned devil caterpillar looks like it belongs on an alien planet.

37) The spikes on the hickory horned devil caterpillar are scary.

Determine if the statement is true or false.

- **38**) Hickory horned devil caterpillars can grow to the size of your hand.
- **39)** Hickory horned devil caterpillars are dangerous to humans and animals.
- 40) Hickory horned devil caterpillars have red dots running down their sides.
- **41**) Hickory horned devil caterpillars live only in the western United States.
- **42)** Hickory horned devil caterpillars may eat the leaves from hickory trees.
- **43)** Hickory horned devil caterpillars transform into spiders.
- **44)** The hickory horned devil caterpillar will grow up to be a beautiful butterfly.
- **45)** The hickory horned devil caterpillar stay a caterpillar all it's life.
- **46**) Hickory horned devil caterpillars hatch from an egg.
- **47**) Hickory horned devil caterpillars are a bright green color.

Determine which choice is the expanded form of the underlined contraction.

- **48**) <u>It's</u> amazing how they transform into beautiful regal moths.
 - A. It was B. It is
 - C. It does D. It has
- **49**) Their horns and bright colors make them look scary, but <u>they're</u> actually pretty cool.
 - A. they areB. they doC. they wereD. they do
 - C. they were D. they is

50) Hickory horned devil caterpillars <u>aren't</u> harmful to humans.

- A. cannotB. are ableC. will notD. are not
- **51**) These caterpillars <u>don't</u> just eat hickory leaves.
 - A. do notB. does notC. did notD. cannot
 - D. cannot

52) <u>They're</u> one of the largest caterpillars in North America.

A. They isB. They wereC. They areD. They do

Determine if the sentence is a declarative(d), exclamatory(e), interrogative(i) or imperative(m).

- 53) These caterpillars are one of the largest caterpillar species in North America!
- 54) If you see a hickory horned devil caterpillar be sure to take a photo of it.
- 55) What makes hickory horned devil caterpillars unique?
- **56)** It's amazing that hickory horned devil caterpillars turn into regal moths!
- **57**) The life cycle of hickory horned devil caterpillars takes about a year.
- **58)** How many legs do hickory horned devil caterpillars have?
- **59)** Hickory horned devil caterpillars have bright colors and large horns.

- 60) Are hickory horned devil caterpillars harmful to humans?
- 61) These caterpillars mainly eat the leaves of hickory, walnut, and sweetgum trees.
- **62)** If you find a hickory horned devil caterpillar, gently pick it up and place it on a tree branch.
- 63) Wow, these caterpillars can grow up to 6 inches long!
- 64) Be careful with hickory horned devil caterpillars, their spines can sting!

Hickory Horned Devil Caterpillars

Name: Answer Key

			:
So	lve	each	problem.

Use the article to answer the question. 1) What does a hickory horned devil caterpillar transform into? A. a monarch butterfly B. a viper moth D. a hickory horned moth 2) What is one of the largest moths in North America? A. Super Moth B. Giant Moth C. Regal Moth 3) What color are the tiny dots on the hickory horned devil caterpillars? A. red B. yellow C. blue 4) Where are hickory horned devil caterpillars usually found? A. South America B. Africa C. Europe 5) How long does it take for a hickory horned devil caterpillar to emerge as a Regal Moth after becoming a pupa? A. a few months B. a few days C. a few years 6) What color are the hickory horned devil caterpillars? A. a few months B. a few days C. a few years 7) What tolor are the hickory horned devil caterpillars? A. prown B. a red C. black 7) What type of trees do hickory horned devil caterpillars? A. apple, pear, cherry, and plum trees B. bamboo, palm, eucalyptus, and willow trees 7) What type of trees do hickory horned devil caterpillars eat? A. apple, pear, cherry, and plum trees B. bamboo, palm, eucalyptus, and willow trees 8) Are the horns on a hickory horned devil caterpillars harmful to humans and other animals? A. Yes B. Only to other animals 9) Do the spiky horns on the hickory horned devil caterpillars' heads hutt? A. Only if they shoot them out B. Only to other animals 9) Do the spiky horns on the hickory horned devil caterpillars heads hutt	Solv	e each problem.							
A. a monarch butterfly B. a viper moth C. a Regal Moth D. a hickory horned moth 2) What is one of the largest moths in North America? A. Super Moth B. Giant Moth C. Regal Moth D. Mega Moth 3) What color are the tiny dots on the hickory horned devil caterpillars? A. red B. yellow C. blue D. green 4) Where are hickory horned devil caterpillars usually found? A. South America B. Africa C. Europe D. The United States 5) How long does it take for a hickory horned devil caterpillar to emerge as a Regal Moth after becoming a pupa? A. a few months B. a few days C. a few years D. a few weeks 6) What color are the hickory horned devil caterpillars? A. brown B. red C. black D. green 7) What type of trees do hickory horned devil caterpillars eat? A. apple, pear, cherry, and plum trees B. bamboo, palm, eucalyptus, and willow trees C. hickory, walnut, persimmon, sweet gum, and ash trees D. pine, oak, maple, and birch trees gum, and ash trees 8) Are the horms on a hickory horned devil caterpillars heads hurt? <	Use	the article to answer the question.							
C. a Regal Moth D. a hickory horned moth 2) What is one of the largest moths in North America? A. Super Moth B. Giant Moth C. Regal Moth D. Mega Moth 3) What color are the tiny dots on the hickory horned devil caterpillars? A. red B. yellow C. blue D. green 4) Where are hickory horned devil caterpillars usually found? A. South America B. Africa C. Europe D. The United States 5) How long does it take for a hickory horned devil caterpillar to emerge as a Regal Moth after becoming a pupa? A. a few months B. a few days C. a few years D. a few weeks 6) What color are the hickory horned devil caterpillars? A. brown B. red C. black D. green 7) What type of trees do hickory horned devil caterpillars eat? A. apple, pear, cherry, and plum trees B. bamboo, palm, eucalyptus, and willow trees C. hickory, walnut, persimmon, sweet gum, and ash trees D. pine, oak, maple, and birch trees gum, and ash trees 8) Are the horns on a hickory horned devil caterpillars heads hut? A. Yes B. Only to other animals	1)	1) What does a hickory horned devil caterpillar transform into?							
 2) What is one of the largest moths in North America? A. Super Moth B. Giant Moth C. Regal Moth D. Mega Moth 3) What color are the tiny dots on the hickory horned devil caterpillars? - 11) What does a hickory horned devil caterpillar look like?
 - B. black with smooth horns and yellow dots
 - C. bright green with spiky horns on their heads and red dots on their sides

A. brown with antennas on their heads

and orange stripes

D. red with long antennas and blue spots on their sides

Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

- 12) "Even though I have a unique look, I still undergo metamorphosis like other insects."
- 13) "I'm not like other tiny caterpillars you may have seen. I can grow to the size of your hand."
- 14) "I hate hickory trees, they taste awful."
- **15**) "I spend my time nibbling on the leaves of trees. I especially love the leaves of hickory, walnut, and persimmon trees."
- 16) "My green color is not just for show, it helps me blend in with the lush green foliage."
- 17) "After a few weeks as a pupa, I am reborn as a beautiful Regal Moth, one of the largest moths in North America!"
- 18) "I do not like to eat from sweet gum trees."
- 19) "See these spiky horns on my head? They might look scary, but they won't harm you."
- 20) "It may sound unappetizing, but I love to eat leaves from the ash tree."
- 21) "I am tiny and barely visible."
- 22) "I don't transform into a moth, I remain a caterpillar throughout my life."
- 23) "You can find me mostly in the eastern parts of the United States."
- 24) "I metamorphose into a pupa, similar to how a butterfly stays in a cocoon."
- 25) "My horns are very dangerous and can harm you."
- 26) "I don't have any color on my body at all, I'm just plain green."
- 27) "My horns are not just for show! They make me look scary and protect me from predators."

Determine if the statement is a fact or opinion based on the information in the article.

- 28) Hickory horned devil caterpillars feed on hickory, walnut, and persimmon trees.
- **29**) Hickory horned devil caterpillars are the most beautiful caterpillars.
- **30)** Hickory horned devil caterpillars live in the eastern United States.
- **31**) The Regal Moth, which the hickory horned devil caterpillar turns into, is one of the prettiest moths in North America.
- 32) These caterpillars are bright green in color.
- **33**) The hickory horned devil caterpillar's transformation into a moth is one of the most incredible in the animal kingdom.
- **34**) The Regal Moth is one of the biggest moths in North America.
- 35) Hickory horned devil caterpillars have red spots on their sides.
- **36**) The hickory horned devil caterpillar looks like it belongs on an alien planet.

Name: Answer Key

37) The spikes on the hickory horned devil caterpillar are scary.

Determine if the statement is true or false.

- **38**) Hickory horned devil caterpillars can grow to the size of your hand.
- **39)** Hickory horned devil caterpillars are dangerous to humans and animals.
- 40) Hickory horned devil caterpillars have red dots running down their sides.
- **41**) Hickory horned devil caterpillars live only in the western United States.
- **42)** Hickory horned devil caterpillars may eat the leaves from hickory trees.
