Name:

Whoosh! Imagine a sleek, big cat leaping through the South American jungle, its coat gleaming in the dappled sunlight, that's a jaguar! This wild cat is the third largest in the world and is known for its powerful build and beautiful rosette-covered fur. Their coat color can vary from yellow to brown, and even black, but all jaguars have unique rosette patterns that set them apart from other big cats. With their sturdy legs and broad head, they are built for strength and agility, making them incredible hunters.

Speaking of hunting, have you ever wondered what's on the menu for a jaguar? Jaguars are carnivores, which means they love meat! Their favored dishes include deer, tapirs, capybaras and even caimans, which are a type of crocodilian - that's one brave cat! They use their strong jaws and sharp teeth to deliver a killing bite to their prey, making them the top predator in their habitat.

Just as our lifestyles change as we grow, jaguars go through different stages in their life too. Baby jaguars, called cubs, are born blind and rely on their mother for the first two years of their life. As they grow older, they learn to hunt and survive in the wild, eventually leaving their mother to find their own territory. A jaguar's life span is usually between 12 to 15 years in the wild, but in captivity, they can live up to 23 years.

Jaguars and humans have a complex relationship, shaped by both admiration and conflict. While these majestic cats are admired for their power and beauty, they are also often feared and hunted, due to their potential threat to livestock. Efforts are being made to protect the jaguar's habitat and educate people about the importance of this wonderful creature to the ecosystem. So, next time you see a jaguar, even if it's just a picture, remember the fascinating journey this big cat has in the wild.

Solv	e each problem.		
Use	the article to answer the question.		
1)	What color can a jaguar's coat be?		
	A. Green, brown, or black	В.	Pink, brown, or black
	C. Yellow, brown, or black	D.	White, brown, or black
2)	What is the lifespan of a jaguar in the wild?	?	
	A. Less than a year	B.	20 to 25 years
	C. 5 to 8 years	D.	12 to 15 years
3)	What do jaguars like to eat?		
	A. Frogs, lizards, and snakes	В.	Deer, tapirs, capybaras and caimans
	C. Elephants, zebras, and lions	D.	Birds, mice, and rabbits
4)	How long do jaguars rely on their mother?		
	A. First year of their life	B.	First six months of their life
	C. First five years of their life	D.	First two years of their life
5)	What kind of diet do jaguars follow?		
	A. Carnivores	B.	Herbivores
	C. Pescatarians	D.	Omnivores
6)	What makes jaguars different from other bi	g cats	?
	A. Their size	В.	Their speed
	C. Their patterns	D.	Their eye color
7)	Who is the top predator in a jaguar's habitat	t?	
	A. Jaguars	В.	Anacondas
	C. Cougars	D.	Caimans
8)	What are baby jaguars called?		
	A. Cubs	B.	Calfs
	C. Pups	D.	Kittens
9)	Why are jaguars often feared and hunted by	y hum	ans?
	A. Their negative impact on crops	B.	Their aggression towards humans
	C. Their association with bad luck	D.	Their potential threat to livestock
10)	How long can jaguars live in captivity?		
	A. Up to 15 years	B.	Up to 10 years
	C. Up to 30 years	D.	Up to 23 years

#### Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

- 11) "I live in the wild usually up to 15 years, but in captivity, I can live longer for up to 23 years."
- 12) "We are the smallest wild cats out there."

	Jaguar Name:				
13)					
14)	"In captivity, my lifespan reduces. I can only live up to 10 years."				
15)	"I may look cute and cuddly, but don't be fooled - I'm one of the strongest and most skilled hunters in the jungle."				
16)	"My diet is all about meat - I love eating deer, tapirs and even crocodiles!"				
17)	"I am very independent. As soon as I am born, I can survive on my own."				
18)	"We jaguars are harmless. We pose no threat."				
19)	"All jaguars have the exact same rosette patterns on our fur."				
20)	"I have a coat with rosettes on it. This pattern helps me blend into my environment."				
21)	"In the wild, I can live for over 30 years!"				
22)	"I'm usually found in the jungles of South America, where I prowl and hunt with my strong jaws and sharp teeth."				
23)	"I'm a vegan, I mainly feast on fresh fruit and leaves from trees."				
Dete	ermine if the statement is a fact or opinion based on the information in the article.				
24)	Jaguars can live up to 23 years in captivity.				
25)	It is amazing that jaguars can run as fast as 50 miles per hour.				
26)	Baby jaguars are called cubs.				
27)	Jaguars are the most beautiful of all felines.				
28)	Jaguars can have a coat color that ranges from yellow to brown and even black.				
<b>29</b> )	Jaguars' yellow eyes can look very scary.				
30)	Jaguars are the third largest big cat in the world.				
31)	A jaguar's meals include deer, tapirs, capybaras, and even caimans, a type of crocodilian.				
32)	Jaguars are scarier than other big cats.				

**33**) It is quite remarkable that jaguars can eat crocodiles.

#### Determine if the statement is true or false.

- **34)** Jaguars are hunted due to their potential threat to livestock.
- **35**) Jaguars are native to North America.
- **36)** Jaguar cubs are born blind.
- 37) Jaguars are the largest wild cat in the world.
- **38)** Jaguars can live up to 15 years in the wild.
- **39)** Jaguars in captivity live about half as long as those in the wild.
- **40**) Jaguars are born with their spots.
- 41) Jaguars cubs only stay with their mother for about 2 months.
- **42)** Jaguars are carnivores.
- **43)** Jaguars are one of the largest cats in the world.
