

Imagine a bird, jet black from beak to tail, flying across the clear sky - that's a crow for you! These birds are quite common and you can spot them almost everywhere in the world. Their bodies are covered with glossy feathers and they have strong, flexible beaks. If you look closely, you'll notice their smart, shiny eyes that seem to be full of curiosity and intelligence.

Now that you know what they look like, let's explore what these clever birds eat. Crows are omnivores, which means they eat both plants and other animals. They are known to eat insects, small animals, seeds, fruits, and even garbage. Yes, you heard it right, these intelligent birds can adapt to eat almost anything available to them!

Speaking of adapting, crows are not just smart eaters but also clever dwellers. They can live in various places, from forests and mountains to cities and farms. Crows usually live in large family groups and build their nests on tall trees or even on buildings. Their lifespan is pretty impressive too, as they can live up to 20 years!

So, how do crows interact with us humans and other animals? Well, crows have a complex relationship with humans; sometimes they are seen as pests, while other times, they help us by eating harmful insects. Crows can also remember human faces and hold grudges, so be nice to them! When it comes to other animals, crows can be both friendly and defensive, but they always look out for each other in their group. In the world of crows, it's all for one and one for all!

**Solve each problem.****Use the article to answer the question.**

- 1) How long can crows live?
 - A. Up to 5 years
 - B. Up to 10 years
 - C. Up to 20 years
 - D. Up to 30 years
- 2) Where might crows build their nests?
 - A. On the ground
 - B. Under the sand
 - C. In the water
 - D. Tall trees
- 3) What kind of eater is a crow?
 - A. Herbivore
 - B. Carnivore
 - C. Piscivore
 - D. Omnivore
- 4) What size groups do crows usually live in?
 - A. Pairs
 - B. Small family groups
 - C. Large family groups
 - D. Alone
- 5) Where can you spot crows?
 - A. Only in the rainforests
 - B. Almost everywhere in the world
 - C. On remote islands only
 - D. Only in Africa
- 6) What color is a crow from beak to tail?
 - A. Black
 - B. Gray
 - C. Brown
 - D. White
- 7) What can crows remember about humans?
 - A. Human faces
 - B. Human houses
 - C. Human clothes
 - D. Human voices
- 8) What type of plants do crows eat?
 - A. Leaves and bark
 - B. Seeds and fruits
 - C. Flowers and grass
 - D. Stems and rocks

Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

- 9) "We crows are omnivores, which means we eat both plants and meat."
- 10) "Just because I have feathers doesn't mean I fly. I prefer to walk."
- 11) "I'm strictly a plant-eater, animals are my friends, not food!"
- 12) "My maximum lifespan is around 5 years."
- 13) "We build our homes on tall trees and we can live almost anywhere - from forests to cities."
- 14) "Did you know, I can remember your face and even hold grudges if you're not nice to me?"
- 15) "I refuse to eat any sort of meat. Flowers and berries are my go-to meal."

 - C. Flowers and grass
 - D. Stems and rocks

Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

- 9) "We crows are omnivores, which means we eat both plants and meat."
- 10) "Just because I have feathers doesn't mean I fly. I prefer to walk."
- 11) "I'm strictly a plant-eater, animals are my friends, not food!"
- 12) "My maximum lifespan is around 5 years."
- 13) "We build our homes on tall trees and we can live almost anywhere - from forests to cities."
- 14) "Did you know, I can remember your face and even hold grudges if you're not nice to me?"
- 15) "I refuse to eat any sort of meat. Flowers and berries are my go-to meal."

- 16) "I am afraid of humans and run away if I see one."
- 17) "I'm a rare bird, you can only find me in the Amazon rainforest."
- 18) "I can live up to 20 years, that's really long for a bird like me."
- 19) "I soon forget everything. Even if someone hurts me, I won't remember their face"
- 20) "You can find me almost anywhere in the world."
- 21) "My skin is lined with scales instead of feathers."

Determine if the statement is a fact or opinion based on the information in the article.

- 22) Crows have the ability to remember human faces.
- 23) It is fascinating that crows will build their nests on tall buildings.
- 24) A crow's nest can usually be found high in trees or even on buildings.
- 25) Crows seem to have the prettiest feathers amongst all the birds.
- 26) Crows are known to eat insects, small animals, seeds, fruits, and garbage.
- 27) Crows are the most annoying birds because they can eat almost anything, even garbage.
- 28) Crows can live up to 20 years.
- 29) Crows can live in various habitats including forests, mountains, cities, and farms.
- 30) Crows are the smartest birds because they can remember human faces and hold grudges.
- 31) Crows are remarkable since they can live for up to 20 years.

Determine if the statement is true or false.

- 32) Crows will eat almost anything, including garbage.
- 33) Crows cannot live in forests.
- 34) Crows can live up to 20 years.
- 35) Crows are solitary birds and prefer to live alone.
- 36) Crows usually live in big family groups.
- 37) Crows only eat plants.
- 38) Crows typically live for just one year.
- 39) Crows can only be found in mountains.
- 40) Crows can remember human faces.
- 41) Crows have shiny, black feathers.

Determine which choice is the expanded form of the underlined contraction.

- 42) Crows are smart and they'll often work together to solve problems.
 - A. they have
 - B. they will
 - C. they can
 - D. they had
- 43) Crows usually live in groups, but sometimes they're found alone.
 - A. they are
 - B. they have
 - C. they were
 - D. they had

- 44) Crows aren't very picky eaters and will eat almost anything.
 - A. is not
 - B. will not
 - C. have not
 - D. are not
- 45) Crows don't always build their nests in trees.
 - A. do not
 - B. does not
 - C. will not
 - D. cannot
- 46) Crows can't fly as high as some other birds.
 - A. have not
 - B. can
 - C. cannot
 - D. will not

Determine if the sentence is a declarative(d), exclamatory(e), interrogative(i) or imperative(m).

- 47) Crows are social animals.
- 48) What are baby crows called?
- 49) Crows can mimic sounds like human speech.
- 50) Crows are intelligent birds.
- 51) Do crows have any predators?
- 52) What color are crows?
