

Solve each problem.

1)  $\frac{3}{5} - \frac{2}{7} =$

2)  $\frac{2}{3} + \frac{1}{7} =$

3)  $\frac{2}{3} - \frac{3}{5} =$

4)  $\frac{7}{8} + \frac{3}{5} =$

5)  $\frac{8}{10} - \frac{3}{4} =$

6)  $\frac{4}{6} + \frac{3}{10} =$

7)  $\frac{4}{5} - \frac{4}{6} =$

8)  $\frac{1}{2} + \frac{1}{6} =$

9)  $\frac{7}{8} - \frac{2}{5} =$

10)  $\frac{8}{9} + \frac{1}{6} =$

Solve each problem.

1)  $\frac{3}{5} - \frac{2}{7} = \frac{21}{35} - \frac{10}{35} = \frac{11}{35}$

2)  $\frac{2}{3} + \frac{1}{7} = \frac{14}{21} + \frac{3}{21} = \frac{17}{21}$

3)  $\frac{2}{3} - \frac{3}{5} = \frac{10}{15} - \frac{9}{15} = \frac{1}{15}$

4)  $\frac{7}{8} + \frac{3}{5} = \frac{35}{40} + \frac{24}{40} = 1\frac{19}{40}$

5)  $\frac{8}{10} - \frac{3}{4} = \frac{16}{20} - \frac{15}{20} = \frac{1}{20}$

6)  $\frac{4}{6} + \frac{3}{10} = \frac{20}{30} + \frac{9}{30} = \frac{29}{30}$

7)  $\frac{4}{5} - \frac{4}{6} = \frac{24}{30} - \frac{20}{30} = \frac{4}{30}$

8)  $\frac{1}{2} + \frac{1}{6} = \frac{3}{6} + \frac{1}{6} = \frac{4}{6}$

9)  $\frac{7}{8} - \frac{2}{5} = \frac{35}{40} - \frac{16}{40} = \frac{19}{40}$

10)  $\frac{8}{9} + \frac{1}{6} = \frac{16}{18} + \frac{3}{18} = 1\frac{1}{18}$
