

**Convert each decimal to a fraction.**

Converting from a decimal to a fraction is simple as long as you remember the place values.

**0.9**

The example above is nine-tenths. Lets look at how we'd write that as a fraction.

$$\frac{9}{10}$$

0.63

We do the same thing for the problem above. But because it is into the hundredths place we put our number over 100.

$$\frac{63}{100}$$
