

**Solve each problem.****Answers**

- 1) A movie theater sells 285 buckets of popcorn a day. If each bucket has 53 pieces of popcorn in it, how many pieces do they sell in a day?
- 2) Each day the gumball machine in the mall sells 547 gum balls. How many gum balls would they have sold after 52 days?
- 3) Isabel was building a LEGO tower. She built it with 543 stories and with 16 blocks on each story. How many LEGO blocks would she have used?
- 4) A golf course driving range goes through 308 golf balls a day. How many golf balls would they go through in 40 days?
- 5) A gas station sells 818 gallons of gas an hour. How much gas would they have sold after 65 hours?
- 6) Luke was collecting cans for recycling. In 5 months he had collected 584 bags with 28 cans inside each bag. How many cans did he have total?
- 7) Every hour a soup company produces 460 liters of soup. How much soup would the company have made after 89 hours?
- 8) A pallet of toggle bolts weighs 836 kilograms. If a warehouse has 26 pallets, what is their total weight?
- 9) The booths at the state fair make 517 dollars an hour. How much money would they have earned after 92 hours?
- 10) A construction crew uses 265 pounds of concrete for each section of a parking garage. If the garage is going to have 95 sections, how many pounds of concrete will they need?
