

Solve each problem.

- 1) Gwen uploaded twelve pictures from her phone and eight from her camera to Facebook. If she sorted the pics into five different albums with the same amount of pics in each album, how many pictures were in each of the albums?
- 2) Will made twenty-four dollars mowing lawns and eight dollars weed eating. If he only spent four dollar a week, how long would the money last him?
- 3) For homework Bianca had twelve math problems and eighteen spelling problems. If she can finish five problems in an hour how long will it take her to finish all the problems?
- 4) For Halloween Vanessa received thirty-one pieces of candy from neighbors and nine pieces from her older sister. If she only ate eight pieces a day, how long would the candy last her?
- 5) Tiffany was making baggies of cookies with six cookies in each bag. If she had seventeen chocolate chip cookies and nineteen oatmeal cookies, how many baggies could she make?
- 6) The school's debate team had twenty-three boys and five girls on it. If they were split into groups of seven how many groups could they make?
- 7) Sarah's class is going on a field trip to the zoo. If each van can hold three people and there are six students and three adults going, how many vans will they need?
- 8) A vase can hold eight flowers. If you had eleven carnations and thirty-seven roses, how many vases would you need to hold the flowers?
- 9) The school's baseball team had twenty-two new players and eight returning players. If the coach put them into groups with five players in each group, how many groups would there be?
- **10**) For a birthday party Frank bought twenty regular sodas and thirty-four diet sodas. If his fridge would only hold nine on each shelf, how many shelves would he fill up?
