

**Solve each problem.****Answers**

- 1) Will was putting his spare change into piles. He had five piles of quarters and two piles of dimes. If each pile had three coins in it, how many coins did he have total?
- 2) Paige's favorite band was holding a concert where tickets were four dollars each. Paige bought four tickets for herself and her friends and three extra tickets in case anyone else wanted to go. How much did she spend?
- 3) At Victor's Restaurant a group with eight adults and two children came in to eat. If each meal cost eight dollars, how much was the bill?
- 4) A waiter had four tables he was waiting on, with two women and two men at each table. How many customers total did the waiter have?
- 5) Maria had seven pages of math homework and three pages of reading homework. If each page had seven problems on it, how many problems did she have to complete total?
- 6) John was working as a sacker at a grocery store where he made six dollars an hour. On Monday he worked three hours and on Tuesday he worked two hours. How much money did John make in those two days?
- 7) April's discount flowers was having a sale where each flower was three dollars. If Janet bought six roses and two daisies, how much did she spend?
- 8) Mike bought three boxes of chocolate candy and seven boxes of caramel candy. If each box has six pieces inside it, how much candy did he have total?
- 9) At the town carnival Paul rode the ferris wheel seven times and the bumper cars three times. If each ride cost six tickets, how many tickets did he use?
- 10) Luke was collecting cans for recycling. On Saturday he filled six bags up and on Sunday he filled two more bags. If each bag had six cans in it, how many cans did he pick up total?
