

**Solve each problem.**

**Answers**

- 1) Henry made forty-seven dollars mowing lawns over the summer. If he spent twenty-seven dollars buying new mower blades, how many five dollar games could he buy with the money he had left?
- 2) A pet store had fifty-four puppies. In one day they sold thirty-three of them and put the rest into cages with seven in each cage. How many cages did they use?
- 3) Sam was selling his old games. He started out with fifty-two but sold twenty-five of them. He packed the rest up putting nine games into each box. How many boxes did he have to use?
- 4) Mike bought one hundred two tickets at the state fair. He spent thirty-eight tickets at the 'dunk a clown' booth and decided to use the rest on rides. If each ride cost eight tickets, how many rides could he go on?
- 5) Tiffany was planting vegetables in her garden. She started with fifty-eight seeds and planted thirty-seven of them in the big garden and in each of her small gardens put seven seeds each. How many small gardens did Tiffany have?
- 6) There are one hundred eleven students trying out for the school's trivia teams. If forty-seven of them didn't get picked for the team and the rest were put into eight groups, how many students would be in each group?
- 7) The cafeteria had thirty-seven apples. For lunch they handed out twenty-three to students and decided to use the rest to make pies. If each pie takes seven apples, how many pies could they make?
- 8) Gwen picked fifty-four flowers for her friend's wedding. She was making bouquets with eight flowers in each one. If thirty-eight of the flowers wilted before the wedding, how many bouquets could she still make?
- 9) Katie had forty homework problems. She finished twenty-two of them but still had six pages of problems to do. If each page has the same number of problems on it, how many problems are on each page?
- 10) George is at the library helping put away books. There are sixty-eight book to put away total but a librarian takes forty of them and leaves George with the rest. If he can fit seven books on a shelf, how many shelves will he need?
