Solve each problem.

1) There were sixteen friends playing a video game online when nine players quit. If each player left had four lives, how many lives did they have total?

1. _____

2. _____

2) Each chocolate bar in a box cost $6. If a box had eleven bars total and Bianca sold all but two bars, how much money would she have made?

3. _____

4. _____

3) Will invited twelve friends to a birthday party, but six couldn't come. If he wanted to buy enough cupcakes so each person could have exactly four, how many should he buy?

5. _____

6. _____

4) Robin earned five points for each bag of cans she recycled. If she had six bags, but didn't recycle two of them, how many points would she have earned?

7. _____

8. _____

5) Sam earned seven dollars for each lawn he mowed. If he had nine lawns to mow, but forgot to mow seven of them, how much money did he actually earn?

9. _____

10. _____

6) Adam had three action figures, but needed six total for a complete collection. If each one costs $4, how much money would he need to finish his collection?

7) Jerry had ten video games but three of them weren't working. If he wanted to sell the working games for $8 each, how much money could he earn?

8) In a video game, each enemy defeated gives you nine points. If a level has ten enemies total and you destroy all but three of them, how many points would you earn?

9) A worksheet had five problems on it. If a teacher had thirteen worksheets to grade and had already graded five of them, how many more problems does she have to grade?

10) April's discount flowers was having a sale where each rose was six dollars. If April started with four roses and had two roses left, how much money did she earn?
